Overview

ABSTRACT

Le Plan d'Action du Sommet a recommandé la mise en place de mécanismes appropriés pour le suivi des progrès accomplis dans l'atteinte des objectifs retenus pour la décennie. A l'ore de la fin de la décennie, l'UNICEF, en collaboration avec l'OMS, l'UNESCO et d'autres institutions a développé un ensemble de 75 indicateurs sur des aspects spécifiques de la situation des enfants.

La tragédie qu'a connu le Rwanda et qui a atteint son paroxysme en avril 1994 pour se poursuivre pendant 3 mois n'a pas permis de mettre en oeuvre le Plan National d'Action qui en fait a perdu de sa substance et de sa pertinence pratiquement ds son entre en vigueur. La population vulnérable, en particulier celle des enfants, s'est considérablement accru, les ressources financières, au niveau des familles, des organisations et de l'état se sont réduites, le capital humain s'est fondu. Les premières années de l'après-guerre et génocide furent consacrés aux programmes d'urgence, de consolidation de la sécurité, de la réhabilitation des infrastructures de base. Les conditions normales n'ont t pratiquement rétablies qu'entre 1998 et 1999.

Un Plan d'action National avait t élaboré par le Gouvernement Rwandais en 1991 sur la base d'une analyse de la situation des femmes et des enfants Rwandais par rapport aux objectifs fixés par le Sommet. L'analyse a permis de mettre en exergue les problèmes auxquels font face les femmes et les enfants Rwandais, de même que l'ampleur des solutions y apporter.

Ces problèmes concernent :

La santé des femmes et des enfants

L'eau et l'assainissement:

L'éducation

Enfants vivant dans des circonstances particulièrement difficiles

Dans le domaine de la santé/Nutrition

Dans le domaine de l'eau, de l'assainissement et de l'environnement

Dans le domaine de l'éducation et de l'alphabétisation :

Pour les enfants se trouvant en situations particulièrement difficiles : assistance, promotion et protection de ces enfants.

Dans le domaine de la promotion de la femme : proposition des mesures destinées réduire les inégalités de chance d'accès entre les hommes et les femmes différents niveaux d'éducation et d'emploi, et aux ressources financières et matérielles (amélioration du statut juridique de la femme, accroissement du nombre des organisations et groupements féminins,

participation des femmes dans la prise de décision tous les niveaux).

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Mnages, Femmes, Enfants

Scope

NOTES

La porte de l'enquete par grappes indicateurs multiples comprend:

Questionnaire Mnage: Cadre d'information sur le mnage: Enregistrement des membres du mnage, Education, Travail des enfants, Eau et Assainissement, Sel iod.

Questionnaire Femme: Mortalit Maternelle, Mortalit des enfants, Anatoxine ttanique, Sant de la mre et du nouveau-n, Contraception, VIH/SIDA.

Questionnaire Enfant: Enregistrement des naissances et ducation prscolaire, Vitamine A, Allaitement , Traitment des maladies, Paludisme, Vaccination, Anthropoltrie.

Sampling

Sampling Procedure

L'échantillon de l'enquête indicateurs multiples du Rwanda a été conçu de façon à produire des estimations au niveau national. Toute fois une stratification a été faite (Kigali-ville, Autres villes, Rural, bien qu'elle ne fasse pas objet d'analyse détaillée dans le présent rapport).

L'échantillon du MICS est un sous échantillon de l'Enquête Démographique et de Santé (EDS). Le tirage a été fait en deux degrés. Au premier degré, 353 grappes ont été tirées proportionnellement à la taille et au deuxième degré 4589 ménages ont été systématiquement tirés. Certaines grappes ayant été tirées plus d'une fois, un regroupement secondaire a permis d'enquêter dans 325 grappes secondaires.

Response Rate

Sur les 4589 ménages échantillonnés, les logements de 4425 ménages étaient effectivement trouvés, et 4205 ont été interviewés, soit un taux de réponse de 95%. Lors de l'interview, sur un total de 862 femmes éligibles (âgées de 15-49 ans et ayant eu une naissance vivante les 12 derniers mois) qui ont été identifiées, 748 ont été effectivement interviewées, soit un taux de réponse de 86,8%. D'autre part, 3168 enfants de moins de cinq ans ont été identifiés dans les ménages. Les questionnaires enfants de moins de

5 ans ont été remplis pour 3154 enfants soit un taux de réponse de 99,6%.

Questionnaires

Overview

En plus du questionnaire ménage, un questionnaire pour les femmes âgées de 15- 49 ans et un questionnaire pour les enfants de moins de 10 ans ont été utilisés dans chaque ménage. Les enfants de 5 à 9 ans ont été concernés seulement par le module incapacités des enfants. Les questionnaires utilisés lors de l'enquête MICS2 Rwanda étaient basés sur le questionnaire modèle du MICS2. Cependant, les modules mortalité des enfants, l'utilisation de la contraception, le VIH/SIDA, la mortalité maternelle n'ont pas été couverts dans la mesure ou ils sont inclus dans l'Enquête Démographique et de Santé (EDS) qui s'est déroulée presque sur la même période. Sur la base de la version française, le questionnaire a été traduit en langue nationale (Kinyarwanda) afin de faciliter l'interview. Un pré-test a été organisé en début de la deuxième quinzaine du mois de juillet 2000 et a permis la finalisation du questionnaire de l'enquête.

DATA COLLECTION NOTES

La formation des enquêteurs du MICS2 a dure deux semaines au cours de la premiere quinzaine du mois de juillet 2000. La collecte des donnees sur terrain a t mene par six quipes de sept personnes, chacune comprenant trois enquêteurs, trois contrôleurs et un superviseur. Un Coordinateur National de l'enquete dsign par le Ministre des Finances et de la Planification Economique a supervis l'ensemble du processus sous la direction d'un Directeur national du Projet (Directeur de la Statistique). L'UNICEF a mis la disposition du projet un volontaire statisticien des Nations Unies pour appuyer le projet dans la prparation, la collecte et l'exploitation des donnees de mme que pour la rdaction du rapport d'enquete. La collecte des donnees a dbut le 27 juillet pour se terminer le 15 octobre 2000.

SUPERVISION

La collecte des donnees sur terrain a t mene par six quipes de sept personnes, chacune comprenant trois enquêteurs, trois contrôleurs et un superviseur. Un Coordinateur National de l'enquete dsign par le Ministre des Finances et de la Planification Economique a supervis l'ensemble du processus sous la direction d'un Directeur national du Projet (Directeur de la Statistique). L'UNICEF a mis la disposition du projet un volontaire statisticien des Nations Unies pour appuyer le projet dans la prparation, la collecte et l'exploitation des donnees de mme que pour la rdaction du rapport d'enquete.

Data Processing

Data Editing

La saisie des données de l'enquête a été faite sur huit machines en utilisant le logiciel EpiInfo. Cependant, la saisie des données était précédée d'une vérification des questionnaires qui a été effectuée par une équipe de douze personnes chargées d'évaluer la qualité des données collectées sur terrain et d'apporter des corrections le cas échéant. La saisie double des données a été retenue pour limiter les erreurs de saisie. Les programmes de saisie et de tabulations utilisés sont basés sur les programmes standards du MICS2 qui ont été adaptés au questionnaire du Rwanda. Le traitement des données a débuté le 18 septembre et s'est terminé le 14 décembre 2000.
